

KREATIV CAR BUILDING WORKSHOP

OUTDOOR AND INDOOR PROGRAM

The Kreativ Car Building Workshop is a hands on, creative, fun and exciting team experience held in the grounds of the Giardino Verde. Each team will be given a work station equipped with everything you need including a set of instructions (no construction plan) and construction materials: a big wood board, 2 lengths of wood, electric saw, drills, screws and planning materials.

The car must meet the following requirements: the car must have a steering facility, brakes and must be able to carry the whole team for the duration of the race track without anyone touching the ground.

Once the construction time is over the teams get the chance to test their creations to the limit on our racetrack. Speed is of the essence and the fastest car down the track will be crowned champion! An additional award will also be presented for the most creative car.

Car building workshop
